Gas Pasta Cooker

Model: FLM-PC11-NG

- Open pot structure, transfers heat to plates located strategically outside of the water tank.
- Intense heat rapidly heats the stainless steel sides and the water inside of the water tank.
- Behind the door snap action millivolt control, Doesn't require electric connection.
- The temperature control range 86°F-257°F (30°C-125°C).
- Over temperature protection on 260°F (127°C), more than it, cut off gas.
- Four stainless steel adjustable legs.
- Large cold zone. captures and holds particles out of the heating zone, reduces taste transfer.
- The pasta cookers are among the industry's most reliable and trusted equipment with highly efficient burners and a variety of basket configurations.
- They can be used to cook fresh or dry pasta.
- This appliance is manufactured for commercial installation only, not intended for home use.
- Gas connections 3/4" Male NPT. Supply gas pressure not to exceed 14" W.C.(1/2 PSI).
- An adequate ventilation system is required for Commercial Cooking Equipment.
- Water connection 1/2"Male NPT.
- Waste water drain connection 1"Male NPT.
- Require a 6" clearance at both side and rear adjacent to combustible construction
